Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

- A Team gathering: Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
  - B Set the goal: Think about the problem you'll be focusing on solving in the brainstorming session.
  - C Learn how to use the facilitation tools: Use the Facilitation Superpower story on a happy and productive session.
- Open article

Define your problem statement

What problem are you trying to solve? Frame your problem as a how might we statement. This will be the focus of your brainstorm.

5 minutes

JOBS AND SKILL RECOMMENDER

To develop an end-to-end web application capable of displaying the current job openings based on the user's skill set. The user and their information are stored in the Database. An alert is sent when there is an opening based on the user's skill set. Users will interact with the chatbot and can get the

Key rules of brainstorming

- Stay in the topic. Don't jump to conclusions.
- Encourage wild ideas. Listen to others.
- Build on the ideas of others.
- Go for volume.
- If possible, be visual.

Brainstorm

Write down any idea that comes to mind that addresses your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil icon to switch to sketch mode to start drawing!

Group ideas

Take turns sharing your ideas while listening to similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

After you collaborate

You can export the mural as an image or PDF to share with members of your company who might find it helpful.

Quick add-ons

- A Share the mural: Share a view link of the mural with stakeholders to keep them in the loop about how it comes off the session.
- B Export the mural: Export a copy of the mural as a PNG or PDF to attach to emails, include in slides or save to your drive.

Keep moving forward

- Strategy blueprint: Define the components of a new idea or strategy. Open the template
- Customer experience journey map: Understand customer needs, motivations, and obstacles for an experience. Open the template
- Strengths, weaknesses, opportunities & threats: Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan. Open the template

DESCRIPTION.

The scores alloted to the skills are given based on 2 things i) What the employers demands ii) What skills are in demand and

Employer can search and select right candidate based on scores

Candidates can be eliminated depending on the employers eligibility

Notifications and SMS-based recommendation process where in it will be sent to the candidate in case someone is interested in recruiting them

Two types of matching are done as it will provide the better results for job recommendation

If the candidate is not skilled enough based on his job preferences we will recommend skills to learn and provide links to enrich their skills from other websites

Scored based recommendation: where the skill score of the candidates are scored

Employer can search and select right candidate based on scores

If the candidate is not skilled enough based on his job preferences we will recommend skills to learn and provide links to enrich their skills from other websites like youtube or

Can show graphical representation of results

Can be linked to other popular job recommendation websites like naukri

Depending upon the employer the skill scores may vary based on their priority

Feasibility

Regardess of the importance which idea is more or less feasible both and others (Cost, time, effort, complexity, etc.)

Scored based recommendation

There required skill set is placed in a table in the form of a data dictionary which updates the jobs and its requirements based on the current postings

Matching can be done with respect to keywords

Job skill scores can be based on the most used skills

The scores alloted to the skills are given based on 2 things i) What the employers demands ii) What skills are in demand

Two types of matching are done as it will provide the better results for job recommendation.

Notifications and SMS-based recommendation process where in it will be sent to the candidate in case someone is interested in recruiting them

Importance

If each of these

to assess and get done without any difficulty or cost which would have the most positive impact?
